

COMMUNITY PARTNERS

Damian's Village was created to work collaboratively with community partners - local agencies, schools, churches and stakeholders for the benefit of families in need of additional resources, guidance, and support - families caring for their medically fragile, special needs child/ren (biological, foster, and/or adoptive) are often overwhelmed and frustrated with the "red tape" of the so-called system, thus leaving a family to possibly not follow through with a provider or not knowing where to turn to start the process of obtaining a specialist or a piece of medical equipment for their child/ren.

As an organization entrenched within the community and with established experience in dealing with an array of providers, Damian's Village, serves as a partner and works with community partners and families to address their needs and help work through "the process" to obtain their item of need or service. The goal of Damian's Village is to help families: educate self, provide training, guide families to be a member of the child/children medical team, obtain relevant resources, and be an advocate for my child/children.
