

SPECIALTY APPOINTMENTS

As Damian's Village continues to evolve, a goal of the organization is to be a "ONE STOP SHOP" for families – meaning while attending the after-school program, a child can receive therapeutic services.

The goal is to have service providers conduct the necessary prescribed treatment at the facility ensuring the child receives their treatment on a consistent bases – yes, a parent is a needed partner when it comes to the therapeutic treatment of their child but at times a parent cannot make that required time commitment for a variety of reasons (i.e. lack of work flexibility, transportation issues, school commitment, etc.) but they understand the importance of getting the services for their child sometimes, through no fault of theirs, they just cannot meet that commitment.

Damian's Village will provide specialty services via collaborative partnerships to help those families meet their commitment - be the consistent arm and partner to the family, relieving the stress and frustration so many of our single head of household families face.
