

AFTER-SCHOOL PROGRAM

Damian's Village future is to provide families with an after-school program where school age children can attend immediately following school dismissal.

The goal of the after-school program is to provide an opportunity for families to enroll their special needs child in a program where their children/child can participate in educational programming, enjoy skill building activities, and be surrounded in a safe and nurturing environment by a staff experienced in caring for a child/children with an array of diagnosis.

Families can register their child/children for the afterschool program and we encourage families to volunteer their time to help with the monthly registration fee – no child/children will be turned away when a family is in need of support.
